

VideoFlex **Extra**

Now you can print on leather and nylon with confidence and quality. VideoFlex Extra is designed for use on difficult-to-print textiles such as nylon and leather. Developed with a special adhesive which bonds flawlessly to most nylons, leathers and other challenging textile surfaces. Due to the wide variety of different coatings used to manufacture nylon fabrics, we suggest testing the product on a sample of your material before running production.

Use On:

- 100% Polyester
- 100% cotton
- All poly/cotton blends
- Leather
- Most woven nylons

Application:

- Remove pink liner from adhesive surface
- Cut names, numbers, and logos in reverse
- Preheat garment at temperature of 330F degrees for 4 seconds
- Position logo on garment
- Heat apply at 330F degrees for 4 seconds, medium pressure
- Peel Cold
- Cover image with Teflon sheet
- RE-PRESS at same temperature and pressure for 10 seconds and peel hot

Available Colors:

White, Black, Royal , Navy, Red, Yellow, Green, Orange, Fuchsia, Light Blue, Brown, Gold, Silver, Bordeaux, Violet
